R E G U L A T I O N S.

THIS Society, under the name of THE LYCEUM MEDICUM LONDINENSE, was instituted for the advancement of medical knowledge, January 25, 1785, under the patronage of Dr. Fordyce and Mr. Hunter, when the following resolutions were unanimously agreed to :

I.

That no gentleman can be elected into the Society who is not a student or practitioner in some of the branches of medicine.

II.

That the society shall consist of honorary, corresponding, and ordinary members.

III.

That the honorary members shall consist of teachers of the different branches of medicine in London ; and shall be limited to six in number.

IV.

That the corresponding members shall consist of public teachers, and of physicians and surgeons to public charities.

V.

That the ordinary members shall consist of the three following classes :

The first class shall consist of such gentlemen as shall have taken a degree in physic, are members of the surgeons or apothecaries company, or are established in practice in surgery, pharmacy, or chemistry.

The second class shall consist of members who have attended an hospital, one course of lectures on anatomy, and the practice of physic ; or, if they have not attended an hospital, shall have been house-pupils to a teacher of any of the branches of medicine for three years.

The third class shall consist of such as have only entered upon a course of medical studies.

VI.

That the members of the two first classes shall be required to read to the Society, dissertations on some subject connected with medicine, in the order of their names upon the list.

VII.

That the members of the third class shall have no vote in the society ; but, when qualified, shall be considered as members of the second class.

VIII.

That the members of the second class, when qualified, shall, upon paying an additional half-guinea, be admitted as members of the first class.

IX.

That the meetings of the society shall be held at Mr. John Hunter's lecture-room, Castle-street, Leicester-square; and shall commence, annually, on the second Friday in October, and be continued on every succeeding Friday, until the end of May.

X.

That the time of meeting shall be at half an hour after eight o'clock in the evening; and that the business be concluded at eleven.

XI.

That at every meeting, the business of the Society shall be conducted in the following order:

The minutes of the former meeting are to be read.

The names of the members to be called over.

Visitors to be introduced.

Medical news to be received, and continued till half an hour past nine, when the dissertations are to be read and discussed.

XII.

That an extraordinary meeting is to be held on the first Wednesday of every month, to commence at half past eight o'clock, and to conclude at ten.

That the business be conducted in the following order :

The names of the members are to be called over ; and all fines due to the Society collected.

Members are to be balloted for.

Certificates, proposing members, are to be read.

All papers, relating to the affairs of the Society, are to be read and considered.

No visitors are to be introduced at this meeting.

The fine, for non-attendance, to be sixpence.

L A W S.

P R E S I D E N T S.

THE presidents are to be four in number ; and to be elected annually, by ballot, out of the members of the first class, on the first Friday in November. The same persons are not eligible, as presidents, for two successive years.

The presidents are to take the chair in rotation, according to seniority.

In the absence of the president, for the evening, the next in order is to take the chair ; but, if all the presidents should be absent, the chair is to be taken by the senior member present.

ADMISSION OF MEMBERS.

The members of the Society are to be elected by ballot ; and the approbation of two thirds of the members present, is necessary for their admission.

The name of any person desirous of becoming a member of the Society, is to be presented to the president, in a letter, signed by at least two members ; and he is to be balloted for at the ensuing extraordinary meeting.

Members proposed, are to have the liberty of being introduced as visitors till balloted for.

HONORARY MEMBERS.

The honorary members are to be excused from attendance on the meetings of the Society.

CORRESPONDING MEMBERS.

Corresponding members, while in London, are to have the privilege of attending the meetings of the Society.

ORDINARY MEMBERS.

Every ordinary member, upon his admission, after subscribing his name to the regulations of the Society, and paying the admission fees, is to be introduced, in form, to the president.

Any member withdrawing his name from the books of the Society, cannot be re-admitted.

VISITORS.

The president is to have a discretionary power of introducing visitors. The member, whose paper is under discussion, and four other members, in rotation,

according to their seniority, may each of them introduce one visitor.

The names of visitors are to be delivered to the president, in writing, before the business of the evening begins.

No gentleman can be introduced, as a visitor, oftener than three times in a season, without the approbation of the Society.

MEDICAL NEWS.

Medical news is to consist of cases and observations on any subject connected with medicine. All cases, and observations, which are sufficiently interesting, are to be entered, in a book kept for that purpose, by the secretary.

That the Society shall appoint a committee, to examine the cases and observations upon their minutes, with a power to send such as they think proper to Dr. Simmons, to be published in his London Medical Journal, with an official letter from the secretary, the authors giving their consent.

PAPERS.

The members may write on any subject connected with medicine, which has not been written upon be-

fore, during that season ; and are to inform the president of the subject which they have chosen, a fortnight, at least, before the paper is given in.

Each paper is to be read by the author, immediately after the medical news, on the evening in which it is presented ; and on the ensuing evening by the president for discussion ; provided that the discussion of the former paper be finished, and the author present. No paper is to be discussed in the absence of the author.

That there shall be always two papers before the Society for discussion.

That the author of the paper, ordered for discussion, shall, in case of inability to attend his duty in the Society, send such information before eleven o'clock, on the Friday forenoon, to the secretary ; and the secretary shall immediately send to the next member, to require his attendance, that the Society may proceed to discuss his paper ; and if, from any circumstance, both of the members absent themselves, they shall be subject to the fines, laid down in the laws, for not giving in papers at the time appointed for that purpose.

Every member of the first class, after the discussion of his paper, shall be exempted from writing papers in future, and from all fines for non-attendance.

The papers which are read and discussed in the Society, are to be transcribed into a book, kept by the

secretary for that purpose; and each member shall have his own paper returned, after it has been transcribed.

COMMITTEES.

To constitute a committee on any private business, it is necessary that one president, two members of the first, and four, either of the first or of the second class, should be present.

Committees are open to all members.

SECRETARY.

The secretary is to act as treasurer and librarian; to be exempted from writing papers, and from all contributions; to have the money of the Society intrusted to his care, and to be liable to account for it when required; he is likewise to collect the fines and contributions; to enter into the minute-book of the Society all facts which are communicated; and to attend all committees.

In the absence of the secretary, any member of the second class is to be appointed, by the president, to perform his duty for that meeting.

FEEs OF ADMISSION.

Gentlemen admitted into the first class, are to pay one guinea upon their admission.

Gentlemen admitted into the second and third classes are to pay half a guinea ; and, when received into the first class, are to pay an additional half-guinea.

All members, elected into the Society, are to sign the obligation-book, pay the admission fees, and be introduced to the president within the four first meetings after their election ; unless a further time is allowed, upon an application being made to the Society, in failure of which they shall not be considered as eligible to be members of the Society.

FINES.

The president who is absent on the night when he should take the chair, shall be fined half-a-crown, unless he has procured another president to supply his place.

All ordinary members who are absent when their names are called, except those of the first class, who are exempted by having written a paper, shall be fined sixpence, and no excuse shall be admitted. All members who leave the Society before eleven o'clock, without first publicly asking leave of the president, shall be fined sixpence.

Members who do not deliver in their papers at the appointed time, are, for the first omission, to be fined

five shillings ; if they should neglect to deliver it at the next meeting, to be fined ten shillings ; at the next again, twenty shillings ; and if the same neglect shall happen at the fourth meeting, to be expelled.

The secretary neglecting to attend any meeting of the society, or any committee, is to be fined one shilling, unless he assigns a reason which shall be deemed sufficient by a majority of the Society.

The president shall have a discretionary power of fining any member for irregularity.

Such members as refuse to comply with the laws of the Society, or omit paying their fines for three months successively, having official information of such omission from the secretary, are to be expelled.

REGULATIONS

FOR THE PRIZE MEDAL.

I.

THAT the patrons of the Society shall annually propose a medical or philosophical subject or question, on which every member shall be permitted to give in a dissertation.

II.

That the author of the most approved dissertation shall be rewarded with a gold medal, value five guineas.

III.

That the merits of the paper be determined, and the prize adjudged by a committee consisting of the six honorary members of the Society.

IV.

That the prize be publickly delivered to the successful candidate, by one of the patrons of the Society, on the first meeting in January.

V.

That the dissertations, which are to be written in English, but not in the author's hand, be delivered to the secretary of the Society, on or before the first of November.

VI.

That each candidate inscribe his dissertation with a motto, transmitting along with it a sealed letter, bearing the same motto, and containing his name and address, in order that the names of the authors may remain concealed till the prize is adjudged, and the names of all, except the successful candidate, be forever unknown, by the dissertation, and letter, which is unopened, being laid aside till called for, or totally destroyed, according to the desire of the writer.

T H E S I S E S

FOR THE PRIZE MEDAL.

FOR THE YEAR 1787.

“THE Properties of Pus ; particularly those which distinguish it from other Substances : The Cases in which it is formed : The Time its Formation requires ; and the Effects it has upon the Body.”

FOR THE YEAR 1788.

“In what Manner are Cavities, whether formed by Suppuration, Wounds, or otherwise, filled up ? What are the Appearances of their filling up properly ? In what Manner is the new Skin formed ? What are the Symptoms of its forming properly ? In what Cases, and in what Manner are the Parts, which were destroyed, restored ?”

FOR THE YEAR 1789.

“IT is known that Bile consists of Water united with a Matter which is solid, if the Water is eva-

perated from it by gentle Heat, and that the solid Part consists of a Substance similar to a vegetable Resin united with another Substance : What is that other Substance ; and what Effect has it in the Digestion, or otherwise, on the Constitution ?”

REGULATIONS

FOR THE LIBRARY.

I.

THAT no book be allowed to be taken out of the library, without an equivalent sum of money for the whole set being deposited; the librarian being accountable for all the books intrusted to his charge.

II.

That the books are to be borrowed from the librarian, and returned into the library, during the winter, on Friday evening, only from eight o'clock till half past eight; and in the summer, at such times as are determined upon at the last meeting.

III.

That folios and quartos shall only be kept a fortnight; all other books only a week.

That any member wishing to keep a book longer than the time allowed, must make an application to the librarian for that purpose; which cannot be com-

plied with should any other member wish to have the same book.

IV.

That if any book be materially injured, it shall be replaced, or the deposit forfeited.
